# Pipeline Test Letter

DATE: 1-22-18

To Whom It May Concern:

The cargo pipeline on tank barge # 686-1130 was tested to 125 PSI.

The relief valve and pressure gauge was found to be operating as required by 33CFR170, 46CFR35.35, and 46CFR151.45. The relief valve did function as required.

The steam system relief valve did function as required by 46CFR61.15-15.
